Foster 

Founded in 1973, Foster is an Italian company that operates worldwide. It is an integrated organization, with four highly specialized manufacturing plants, operating on different products and processes.

Foster operates in 50 countries through a network of selected partners. It stays close to its customers with quality, efficiency and courteous service. Anytime, anywhere, with a competent sales and technical team and a comprehensive after-sales service.

The multilanguage website is updated daily, because we believe it is not just a tool, but a window on the world.

MADE IN ITALY

Foster's headquarters is in the historic "Terranova palace" in Brescello, a small village known for movies starring Don Camillo and Peppone. Brescello is a symbol of the countryside of northern Italy.

We breathe passion for beautiful things, respect for the environment that surrounds us, and a love for quality, hence our commitment to excellent service to meet the demands of a market increasingly sensitive to technological development and environmental protection. Terranova palace is not just a building, it is the expression of Foster's love for art. In 1988, after the renovations to the former 17th century Franciscan convent, Foster established its headquarters here.

The restoration renovated the splendor to the prestigious frescoes and unearths ancient historical artifacts. The Terranova palace is a cultural heritage that the company wants to give back to the community in all its history, beauty and magnificence. Foster was among the first Italian companies to join projects for environmental preservation and protection, and the building is now under the protection of the "Monuments and Fine Art Office".

QUALITY IN EVERYDAY LIFE

Research, style and beauty, all in one stroke: the Foster brand. The desire to find new solutions to improve the experience and enjoyment of one's kitchen is what drives our research, and the source of our satisfaction. We have reached important goals in developing household appliances, and with the same enthusiasm we share and develop ideas with the most important kitchen manufacturers in Italy and worldwide. Besides using advanced production technologies, Foster pays handcrafted attention to detail: every standard product is custom-made. This is the Foster philosophy: excellence in quality standards, great manufacturing craftsmanship, ever innovative solutions interpreted with our signature style and taste.

Designers of the most renowned kitchens and starred Chefs are the first stakeholders and the best consultants of all our projects, where aesthetics and functionality merge together in a perfect blend. A natural process that begins from a cooking technique is accomplished through the kitchen design.

Design and food. Beauty and passion. These are the cornerstones of our culture, which Foster incorporates and interprets with a strong Italian spirit.

OUR MISSION

Since the beginning, we have created solutions for kitchen environments according to our criteria: high performance with attention to energy efficiency, ease of use enhanced by our design research, and advanced technology as a result of our vast experience.

This is the Foster philosophy, which has inspired each of our products for the last 40 years. A value recognizable today in every product of our range.

AISI 304 STAINLESS STEEL

Foster AISI 304 steel is an austenitic, non-magnetic stainless steel composed of a high Chromium and Nickel content that provides superior strength and durability. AISI 304 steel is also known as 18-10 stainless steel (18% Chromium 10% Nickel). Foster has always performed strict quality control on all stainless steels in every process. This attention to detail, typical of artisan's, has always distinguished Foster products. The thickness of the steel chosen by Foster allows to obtain products that are more solid, resistant and extremely long-lasting.

Foster steels are treated with special vegetable fiber brushes that give the characteristic texture of Foster's steel. This particular process allows to obtain an extra fine surface, impossible to obtain with the classic metal brushes and much easier to clean.

Brushed finish

PVD COLLECTIONS

The PVD finish endows stainless steel with elegant and sophisticated colorations. They are obtained through a physical – not chemical – process granting a higher resistance than any other treatment:

- Exceptional superficial hardness
- Resistance against wear and abrasion
- Resistance against corrosion, solvents, detergents and high acidity food
- Unalterable by UV rays
- Extra-low ecological impact

A rectangular panel with a dark, charcoal grey PVD finish. The surface has a fine, vertical brushed texture. The text is in white, sans-serif font.

GUN METAL

Steel in a dark suit: elegant, quiet, and technological.
Perfect to celebrate the Foster design

A rectangular panel with a gold PVD finish. The surface has a fine, vertical brushed texture. The text is in white, sans-serif font.

GOLD

Noble and with character: gold becomes light and refined.
A perfect match even in a minimal context

A rectangular panel with a copper PVD finish. The surface has a fine, vertical brushed texture. The text is in white, sans-serif font.

COPPER

A warm old-time tinge. It gives steel a new appeal and
personality, in whatever pairing

BURNERS AND GRIDS

The AE dual burner allows ultra-high and ultra-low temperatures thanks to two independent crowns of fire.

All the Foster cooktops are equipped with cast-iron grids, a perfect material due to its many properties: high thermal capacity that improves the cooking efficiency; weight that improves safety; sturdiness; easiness to clean. A continuous platform of cast iron grates make it easy to move large pots and pans.

SAFE COOKING

All Foster cooktops are equipped with safety valves. These shut off the gas supply very quickly if the flame accidentally goes out. The utmost freedom of movement it is guaranteed by the electronic under-knob ignition that allows a one-hand movement.

METAL KNOBS

Exclusive and original, the Foster metal knobs are an example of the strength and quality of the materials used. A distinctive feature shared by all the Foster elements in this collection, form an elegant uniformity in the kitchen.

Foster's Flush-mount installation edge allows the product to be installed either flush with the worktop or on top of it.

STANDARD

Foster's "Standard" recessed edge protrudes from the worktop by 8 mm. All the Foster Standard edges are made of high-quality stainless steel, selected by Foster for its sinks, bowls and gas hobs.

FLUSH-MOUNT

The installation on top of the worktop avoids having to make the recess in the worktop and thanks to the minimum thickness of 1mm, the surfaces will be almost completely integrated.

FLUSH-MOUNT

The Flush-mount FM edge is designed for installation into a 1 mm deep recess on the countertop, which allows the appliance to be perfectly flush with the worktop.

GAS RANGETOPS

THE PERFECT COOKING STATION

Foster's Rangetops bring a professional look to the cooking area. Their steel elegance grants a remarkable visual impact, whatever the style and materials of the kitchen.

POWER AND EFFICIENCY

The last generation AE burners (high efficiency) are efficient and powerful, providing more than 25% energy saving compared to standard burners. All Rangetop models are designed with at least one wok Dual burner of 15.500 Btu/h and the six burner model has even two wok burners. The Dual burners system, or twin-use, offers the possibility to ignite only the inner crown, to heat a small coffee pot or pan, or both crowns, using only one knob.

XXL CAST IRON GRIDS

Performance and practicality are the main features of the Foster Milano Rangetop. The weighty enamelled cast iron grid has extraordinary dimensions, with a working surface up to 50% bigger compared to a normal domestic cooker hob. It is now possible to use all the burners at the same time, even with large pots.

AN ERGONOMIC CONTROL PANEL

The frontal position of the knobs, due to the inclination of the control board, guarantees an everyday practicality. Their generous size and original shape guarantee an easy and safe grip. The under-knob ring is not only a fine stylistic detail, but also of great help when cleaning the hob.

FULLY EQUIPPED

The Foster Milano Rangetop with the in-line burners is also available with an elegant “back shelf” on which the most commonly used products can be stored: salt, spices, and oil can always be within reach (ref. 3154 900).

VERSATILE INSTALLATION

The Foster Rangetop offers a great versatility of installation, it can be built-in in different ways between the kitchen worktops, both in full continuity with other surfaces, or marking a discontinuity to give greater emphasis to its steel structure. Alternatively, the Rangetop can even be simply placed on top of the kitchen counter, in particular, the four-burner-in-line model 3164 900.

1. Sit-up installation on the worktop

2. Sit-up installation on the cabinets and protruding over the worktop

3. Built-in installation flush with the worktop

Foster

OVENS

THE PERFECT EQUIPMENT

The Foster Milano ovens are supplied with an extensive series of accessories, which include an enamelled grill set.

TELESCOPIC GUIDE

The practicality and accessibility to the cooking chamber are increased with the exclusive supply of full extension telescopic chromed racks.

PYROLYTIC CLEANING

Pyrolysis is the easiest way to guarantee an oven that is always clean. Once the cleaning cycle is terminated, just use a damp cloth to remove the residue.

EASY CLEANING

The Foster Milano ovens is supplied with a special anti-fingerprint treatment that makes cleaning the outside of the oven simple and quick.

PERFECT SAFETY

The ability to lock the oven door and the keyboard along with the four glass doors supplied with the oven are the best guarantees for safe and serene use.

MEAT PROBE

Experience the precision of professional cooking with our meat probe that measures in real time the core temperature of your food.

Foster

RANGES

THE PERFECT COOKING STATION

The Foster ranges transform your kitchen into a high-performance work-centre. Uncommon features and oversized dimensions characterize both the cooktop and the oven, granting absolute practicality in any situation.

POWER AND EFFICIENCY

The last generation AE burners (high efficiency) are efficient and powerful, providing more than 25% energy saving compared to standard burners. All Rangetop models are designed with at least one wok Dual burner of 15.500 Btu/h and the six burner model has even two wok burners. The Dual burners system, or twin-use, offers the possibility to ignite only the inner crown, to heat a small coffee pot or pan, or both crowns, using only one knob.

XXL CAST IRON GRIDS

Performance and practicality are the main features of the Foster Milano Rangetop. The weighty enamelled cast iron grid has extraordinary dimensions, with a working surface up to 50% bigger compared to a normal domestic cooker hob. It is now possible to use all the burners at the same time, even with large pots. The frontal position of the knobs, due to the inclination of the control board, guarantees an everyday practicality.

MULTIFUNCTIONAL OVENS

All models feature multifunctional ovens with a varied set of programs with electronic programming, and out of standard sizes with a useful volume of up to 75 liters. The double telescopic guide, available on all models, allows to extract trays and grids with ease and safety.

INDUCTION COOKER

The induction concept, as an alternative to the more traditional gas rangetop, endow the Foster tops with an even more streamlined design. Practical slider controls grant quick and intuitive regulations.

STAINLESS STEEL WORKTOPS

TAILOR MADE

Tailor-made worktop solutions have always been a distinctive feature of Foster. Each custom-made worktop is a unique artifact, thanks to variations and combinations of different surface finishes, structural reinforcement alternatives and a full range of weldable sinks and hobs. The worktops shown on this catalogue are standard and available upon request. For any other worktop layout or configuration, please contact us and we will be happy to verify feasibility and make an offer.

FOSTER FINISHES

The stainless steel finish is the real trademark of Foster. A distinctive element which couples aesthetics and functionality, and underscores a continuous research for the best ergonomics and practicality of use.

The surface has a brilliant satin look. The very low superficial ruggedness makes it very easy to clean. It's a perfect match with all the Foster built-in products.

Standard finish obtained by brushing, it's the most common among the uniform finishes.

Matt finish, obtained by a distinctive irregular finish which gives a "used" look to the surface. It can be partially obtained also on washing and cooking areas.

Matt and irregular finish, obtained by a complex procedure of mechanical erosion. Very high hardness. It can be partially obtained also on washing and cooking areas.

WORKTOP TAILOR MADE

The worktops can be realized by welding together our sinks and cooktops, in order to obtain a sole integrated stainless worktop.
